

# AC BIOBALL

ENVIRONMENTAL  
PRODUCTS (PTY) Ltd

**A CUBE SO STRONG, WE KEEP IT IN A CAGE!**

Bioball is the highly efficient, cost effective and environmentally credible urinal block system that ensures your urinals stay clean, your drains remain clear and your washroom is odour free.

Bioball's highly effective enzyme block is encased by a bio-degradable polymer cage. Bioball can either be free standing or elevated over the flushing waterline with the attachment of an integrated pedestal 'lollipop'. Bio Ball will not dye the urinal or end up being a sludgy mess at the bottom of the drains after a few weeks like some other systems.

## The Benefits:

- \* Bio Ball is 100% environmentally friendly
- \* Bio Ball disperses uric salt and reduces lime scale
- \* Bio Ball's strong anaerobic reaction within the urinal system gradually clears all forms of nasty substances that can cause blockages
- \* Bio Ball reduces the cost of ongoing drain maintenance and servicing
- \* Bio Ball reduces the amount of water needed for flushing by up to 95%
- \* Bio Ball has an average life span of 3 weeks
